

[Acura, Transfer fluid]

2008 Acura MDX transfer case fluid change

<https://bekomcar.com/en/tutorial/pdf/56/>

Parts and tools required for the tutorial

1. General purpose tool box 2. Multipurpose torque wrench 10Nm~150Nm

 Use the correct differential fluid specification. Use the correct torque specifications for both fill and drain plugs (44 Nm, 32 lbs ft)

Changing 2008 Acura MDX transfer case fluid requires genuine Honda SAE 80W90 hypoid gear oil (0.45 quarts or 0.43 L). Although this is for Acura MDX, the same process can be applicable to other Acura and Honda cars.
